About Us

Since 2002, Alertus has dedicated itself to creating emergency mass notification solutions that can be implemented anywhere and activated quickly and effectively.

What We Do

Alertus has engineered innovative emergency alert systems for various industries and organizations designed to simplify the complexities of notification.

Why We Do It

We are committed to providing customizable, scalable, and affordable mass notification solutions because we know even a few seconds of warning can help save lives during an emergency.

Alertus Mass Notification System: How it works
